Skills

Languages: Golang, C++, Python, Javascript, Ruby, SQL.

Technology: Golang, Django, Flask, ExpressJS, React, Redis, ElasticSearch, MySQL, MongoDB, RabbitMQ, Celery, SideKiq, gRPC, AWS, Git, Github Action, Docker.

Experience

ShopUp/ Software Development Engineer - II

September 2021 - Present

- Maintaining higher availability & lower failure rate of Notification service which backs Mokam & RedX to operate SMS, Email & Push Notification.
- Optimized latency from ~2000ms to ~400ms and scaled up throughput to 60 rps for notification services. Also cut down costing to 1/3 of original expense via dynamic sms provider configuration setup.
- Prepared payment reconciliation dashboard to allow retailers to pay in multi-steps and keep those track.

Evaly / Software Engineer

July 2021 - September 2021

- Provided a better Search experience from all Evaly products.
- Lead the relevance-driven search project where search results will be based on the user's searching behavior.
- Increased the percentages of a user landing on a desirable product from the front page of searched results up to 11%.
- Introduced auto rollover group to keep search index in shape.
- Setup the batch processing pipeline with Redis stream for the bulk operation to limit the app server's memory footprint & concurrent call over search DB.

Welcome(formerly NewsCred) / Software Engineer

October 2019 - June 2021

- Set test automation using GitHub Action & Pytest.
- Re-write and Dockerize a Django admin dashboard with React & Flask.
- Handled all sorts of bugs within customer SLA and increased the test coverage of the existing codebase.
- Launched a file-server backed by Flask & AWS S3 service with the ability to render/upload files based on geolocation and impose access restrictions with smart URLs.
- Implemented content synchronizer between microservices based on changes in one end using Celery worker.
- Keep up and running the content ingestion pipeline with python and other AWS services where content comes from various XML/RSS/JSON source feeds.

KickBack Apps / Software Engineer

January 2019 - September 2019

- Built & provisioned the backend of *PhoneLine* and its admin panel with Golang, Redis & RabbitMQ.
- Released an open-source Golang task processor *Cogman* powered by RabbitMQ, Redis & MongoDB.

East West University / Competitive Programming Trainer

May 2018 – February 2019

- Worked with the student to build a strong basic CS background and improve their problem-solving skills.

Problem Setter and Judge

March 2016 – November 2018

- External problem creator at **HackerRank**. Prepared above 40 algorithmic challenges for the coding interview.
- Problem setter and Judge in BACS High School Programming Contest 2018 & NSU Inter-University Girl's Programming Competition 2018.

—

Education

North South University / Bsc in Computer Science & Engineering

Summer 2013 - Spring 2019. Total earned credit - 128 out of 136.

—

Achievement

Sports Programmer

January 2013 – August 2018

1. **Onsite Contest:** Represented NSU in around 20+ National level programming contests. 9th, 12th, 14th, and 16th was the best position among all the participated contests.

2. **Online Contest:** More than two thousand problems have been solved in different types of online judges like UVa, LightOj, Spoj, Codeforces, Codechef, HackerRank, and TopCoder.

—

Project

Yatt: A light weight command line note taking tools.

- **Tools:** Golang
- **Github:** https://github.com/Kimbbakar/yatt

Cogman: An asynchronous task processor in Golang.

- **Tools:** Golang, RabbitMQ, Redis, MongoDB
- **Github:** https://github.com/Kimbbakar/Cogman

BottleCap: Language Parser and Interpreter.

- **Toos:** Flex-Bison, C
- **Github:** https://github.com/Kimbbakar/BottleCap
